

Finishing steps

The same permissions, as on /tmp. Anybody can write, but at the same time cannot remove files of other users.

```
# chmod 1777 /data
#
```

Stopping services that are not required on the system

```
[ Disabling rpc.metad, remote metaset services feature of SVM. ]
# svcadm disable network/rpc/meta
#
```

Installing packages from *Solaris 10 Software Companion CD*

cvs 1.11.17, fileutils 4.1, ncurses 5.2, qt 3.1.1, rpm 4.1, rsync 2.6.3.1, screen 4.0.2

```
# cd /cdrom/cdrom0/components/sparc/Packages
# pkginfo -d . SFWcvs SFWgcmn SFWgfile SFWncur SFWqt SFWrpm SFWrsync SFWscrn
system      SFWcvs    cvs - Concurrent Versions System for version control
system      SFWgcmn   gcmn - Common GNU package
system      SFWgfile  fileutils - GNU file management utilities
system      SFWncur   ncurses - new curses library
system      SFWqt     qt - C++ GUI framework
system      SFWrpm    rpm - Red Hat Package Manager
system      SFWrsync  rsync - A faster, flexible replacement for rcp
system      SFWscrn   screen - A full-screen window manager
